DECISION POINTS

[1] If Patient has been cooled continuously for over 4 hours and has NOT reached target temperature, refer to algorithm (Medivance MT08006).

[2] If water temperature has been below 10˚C for greater than 8 continuous hours, refer to algorithm algorithm (Medivance MT08006).

[3] Shivering must be addressed. If shivering is present, consult with physician for additional shivering control orders.
